Paper 2

Read Carefully

- 1 **Calculators may be used in this paper.**
- 2 Full credit will be given only where the solution contains appropriate working.
- 3 Answers obtained by readings from scale drawings will not receive any credit.

FORMULAE LIST

Circle:

The equation $x^2 + y^2 + 2gx + 2fy + c = 0$ represents a circle centre $(-g, -f)$ and radius $\sqrt{g^2 + f^2 - c}$.

The equation $(x - a)^2 + (y - b)^2 = r^2$ represents a circle centre (a, b) and radius r .

Scalar Product: $\mathbf{a} \cdot \mathbf{b} = |\mathbf{a}| |\mathbf{b}| \cos \theta$, where θ is the angle between \mathbf{a} and \mathbf{b}

$$\text{or } \mathbf{a} \cdot \mathbf{b} = a_1 b_1 + a_2 b_2 + a_3 b_3 \text{ where } \mathbf{a} = \begin{pmatrix} a_1 \\ a_2 \\ a_3 \end{pmatrix} \text{ and } \mathbf{b} = \begin{pmatrix} b_1 \\ b_2 \\ b_3 \end{pmatrix}.$$

Trigonometric formulae: $\sin(A \pm B) = \sin A \cos B \pm \cos A \sin B$

$$\cos(A \pm B) = \cos A \cos B \mp \sin A \sin B$$

$$\sin 2A = 2\sin A \cos A$$

$$\begin{aligned} \cos 2A &= \cos^2 A - \sin^2 A \\ &= 2\cos^2 A - 1 \\ &= 1 - 2\sin^2 A \end{aligned}$$

Table of standard derivatives:

$f(x)$	$f'(x)$
$\sin ax$	$a \cos ax$
$\cos ax$	$-a \sin ax$

Table of standard integrals:

$f(x)$	$\int f(x) dx$
$\sin ax$	$-\frac{1}{a} \cos ax + C$
$\cos ax$	$\frac{1}{a} \sin ax + C$

ALL questions should be attempted.

Marks

1. Find the coordinates of the turning points of the curve with equation $y = x^3 - 3x^2 - 9x + 12$ and determine their nature. 8

2. Functions f and g are given by $f(x) = 3x + 1$ and $g(x) = x^2 - 2$.

(a) (i) Find $p(x)$ where $p(x) = f(g(x))$.

(ii) Find $q(x)$ where $q(x) = g(f(x))$. 3

(b) Solve $p'(x) = q'(x)$. 3

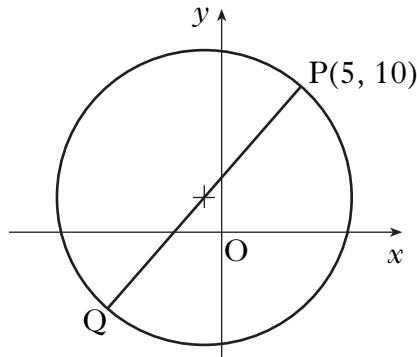

3. (a) (i) Show that $x = 1$ is a root of $x^3 + 8x^2 + 11x - 20 = 0$.

(ii) Hence factorise $x^3 + 8x^2 + 11x - 20$ fully. 4

(b) Solve $\log_2(x+3) + \log_2(x^2 + 5x - 4) = 3$. 5

4. (a) Show that the point $P(5, 10)$ lies on circle C_1 with equation $(x+1)^2 + (y-2)^2 = 100$. 1

(b) PQ is a diameter of this circle as shown in the diagram. Find the equation of the tangent at Q . 5

- (c) Two circles, C_2 and C_3 , touch circle C_1 at Q .

The radius of each of these circles is twice the radius of circle C_1 .

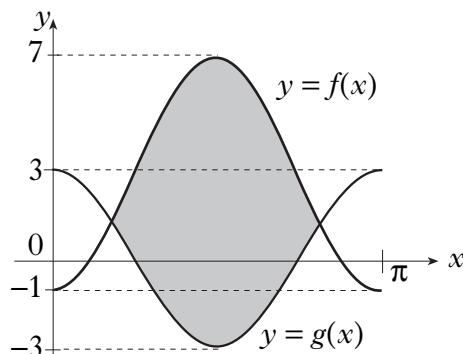

Find the equations of circles C_2 and C_3 . 4

[Turn over

5. The graphs of $y = f(x)$ and $y = g(x)$ are shown in the diagram.

$f(x) = -4 \cos(2x) + 3$ and $g(x)$ is of the form $g(x) = m \cos(nx)$.

- Write down the values of m and n .
- Find, correct to one decimal place, the coordinates of the points of intersection of the two graphs in the interval $0 \leq x \leq \pi$.
- Calculate the shaded area.

1

5

6

6. The size of the human population, N , can be modelled using the equation $N = N_0 e^{rt}$ where N_0 is the population in 2006, t is the time in years since 2006, and r is the annual rate of increase in the population.

- In 2006 the population of the United Kingdom was approximately 61 million, with an annual rate of increase of 1.6%. Assuming this growth rate remains constant, what would be the population in 2020?
- In 2006 the population of Scotland was approximately 5.1 million, with an annual rate of increase of 0.43%.

Assuming this growth rate remains constant, how long would it take for Scotland's population to double in size?

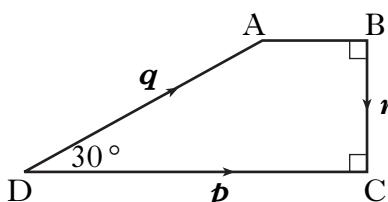

2

3

7. Vectors \mathbf{p} , \mathbf{q} and \mathbf{r} are represented on the diagram shown where angle ADC = 30°.

It is also given that $|\mathbf{p}| = 4$ and $|\mathbf{q}| = 3$.

- Evaluate $\mathbf{p} \cdot (\mathbf{q} + \mathbf{r})$ and $\mathbf{r} \cdot (\mathbf{p} - \mathbf{q})$.
- Find $|\mathbf{q} + \mathbf{r}|$ and $|\mathbf{p} - \mathbf{q}|$.
