1. Treat  $k \sin 1.5t \cos a - \cos 1.5t \sin a$  as bad form only if the equations at the  $\bullet^2$  stage both contain k.

- 2.  $39\sin 1.5t\cos a 39\cos 1.5t\sin a$  or  $39(\sin 1.5t\cos a \cos 1.5t\sin a)$  is acceptable for  $\bullet^1$  and  $\bullet^3$ .
- 3. Accept  $k\cos a = 36$  and  $-k\sin a = -15$  for  $\bullet^2$ .
- 4. •<sup>2</sup> is not available for  $k \cos 1.5t = 36$  and  $k \sin 1.5t = 15$ , however, •<sup>4</sup> is still available.
- 5. •<sup>3</sup> is only available for a single value of k, k > 0.
- 6. •<sup>4</sup> is only available for a single value of a.
- 7. The angle at  $\bullet^4$  must be consistent with the equations at  $\bullet^2$  even when this leads to an angle outwith the required range.
- 8. Candidates who identify and use any form of the wave equation may gain  $\bullet^1$ ,  $\bullet^2$  and  $\bullet^3$ , however,  $\bullet^4$  is only available if the value of a is interpreted for the form  $k \sin(1 \cdot 5t a)$ .
- 9. Candidates who work consistently in degrees cannot gain •<sup>8</sup>.
- 10. Do not penalise additional solutions at  $\bullet^8$ .
- 11. On this occasion accept any answers which round to 1.0 and 1.6 (2 significant figures required).
